

## Guideline Calculator Alert

To get an accurate calculation, you must enter timeshare percentages manually on the main page. The main page is the page you see after you click on the **Start** button. Currently, if you click on the radio buttons on the Advanced Timeshare page, the calculator will fill the **Time with Parent 1** field with 0%. This is due to a calculator defect which will be fixed shortly.

When you use the calculator and you know the timeshare percentage that applies to your situation, enter that percentage in the **Time with Parent 1** field.

If you do not know the timeshare percentage, follow these steps:

- 1 Click on the [Advanced](#) link that appears to the right of the **Time with Parent 1** field.
- 2 Find the description of the timeshare arrangement that applies to your situation and note the percentage that is associated with your timeshare arrangement.
- 3 Click on the Cancel button to return to the main page and enter the percentage from step 2, in the **Time with Parent 1** field.
